

# Chick 7300

## Multi-Specialty Surgical Table

*The modular design of the Chick 7300 easily and economically transforms into a specialty trauma, orthopedic, spine, vascular, urology or pain management table. Just add the accessory package. The table never has to leave the room.*

The unique Cantilevered design of the Chick 7300 offers remarkable imaging access while still allowing for a wide variety of surgical procedures. Accessory packages can be selected to tailor the table for trauma, orthopedics, urology, spine, vascular, and pain management procedures.

### FEATURES AND BENEFITS

- Cantilevered design provides unparalleled imaging access in normal and reverse orientation and allows the operating surface to go as low as 17" and as high as 52" for certain procedures.
- Urology: Independent pelvic tilt adjusts for up to 75° up and 40° down surgical visibility of the perineum without the need for Trendelenburg.
- Spine: Cantilevered design and 55" carbon fiber board allow the operating surface to go down to 17 inches. Even with a Wilson frame at full flex, no step stools are required during surgery.
- Fracture/Trauma: Carbon fiber spars, patented scalloped seat section, and integrated gross traction rail allow for optimal imaging, hip area fall through and easy traction manipulation.
- Vascular/Pain Management: The 55" carbon fiber board allows for 76" of whole body imaging and 52" of 360° imaging.
- Narrow base, 5 point floor fixation system, and shorter tabletop sections provide unsurpassed patient accessibility and table stability.

## SPECIFICATIONS

Head Section Length:	15.75"
Back Section Length:	16.5"
Pelvic Section Length:	10.4"
Width of Table Top:	20.5"
Low Height:	27.7"
High Height:	43.9"
Maximum Patient Weight:	500 lb
Weight of Table:	660 lbs
Lateral Tilting Right/Left:	18°
Trendelenburg:	28°
Back Section:	+/- 28°
Standard Warranty:	2 years

## RECOMMENDED ACCESSORY PACKAGES

Trauma:	Orthopedic kit provides everything needed for supine and lateral lower extremity fracture repairs.
Urology:	Pelvic base, stirrups, uro band and uro catcher bags.
Spine:	36" or 55" carbon fiber board with Flex Frame.
Vascular/ Pain Mgmt:	55" carbon fiber board
