

# CHICK® LP

*The Ultimate Lower Extremity Fracture Table*

*The versatile and easy to use design of the Chick LP table makes it the perfect tool for lower extremity fracture repairs.*

With a radiolucent carbon fiber top, the Chick LP offers unparalleled imaging access and allows for more timely and accurate surgical procedures. The intuitive design of the positioning components simplifies the set-up and operation for both the surgeon and the staff.

## FEATURES AND BENEFITS

- Unique dual base construction provides unmatched positioning stability and 360° C-arm access.
- Top height of 53" allows for standing procedures even for the tallest surgeons.
- 500 lb weight capacity effectively handles a greater range of patients.
- Patented radiolucent table top with beveled edges provides optimal imaging quality and minimal X-ray absorbency.
- Easy and fast set-ups. No additional accessories are required for all supine cases. Everything attaches and stays with the table.
- Included leg transfer board makes it easy for staff to do normal patient transfers.
- Additional accessories are available for lateral procedures.
